

Royal Crown Series

Royal Double Crown Interconnect

Crowning Siltech's world of almost 40 years of ongoing research and development, our engineers succeeded in delivering performance approaching that of Siltech's flagship Triple Crown series but at a more accessible price. The successor to the iconic, much-loved, and multiple award-winning Royal Signature Series, the Royal Crown series has a highly translucent sound that's startlingly open, direct, and engaging.

As befitting its 'Cable Royalty' status, the Crown version uses only Siltech's pure S10 monocrystal silver wire as conductors, while the Double Crown and Triple Crown even use only pure silver connectors. All Royal Crown cables use our new Hexagon construction, previously only seen in Siltech's flagship Triple Crown Power cable. It allows for greater symmetry from every angle and more efficient wire handling for the lowest electromagnetic interference. Siltech's dual-layer insulation of DuPont Kapton and Teflon combined with the Hexagon's air insulation and wide-range shielding results in the lowest inductance and capacitance.

This new range consists of three models that offer increasing performance levels, musicality, and appearance: Royal Single Crown, Royal Double Crown, and the flagship Royal Triple Crown. All models have interconnects, speaker cables, and power cords. There is a wide selection of digital interconnects available as well. The Royal Crown cables are certainly bound to deliver noble and unforgettable listening experiences to all passionate music lovers.
